

MIRRA CHARTS TEMPLATE LOADING AND

TPO SIZE SETTINGS GUIDE

©Mirra Technologies

Once indicators are added we make some basic configurations that required to be done.

Loading Templates:

Step 1:

Right click on the chart and Select *Template* Option from that *Load* Option.

Step 2:

From the LOAD pop-up select the required template and click on button *Load*. Now templates have been loaded successfully

Setting up TPO size:

Step 1:

Click on the *Indicator* icon on the chart tab.

Step 2:

Now select the Mirra TPO in the configured pane and on the right side enter the TPO size in the *Profile Tick Size.*
